Student Statistician/ Data Engineer
École Supérieure Polytechnique de Nouakchott

Summary

Student Statistician and Data Engineer at École Supérieure Polytechnique, passionate about artificial intelligence and data science, aiming to apply these skills ethically to drive innovation and societal progress.

Education

- **École Supérieure Polytechnique de Nouackchott** *October 2022 - Present*
  Engineer's Degree in Statistics and Data Engineering
- **Institut Préparatoire Aux Grandes Écoles d'Ingénieurs**
  Preparatory Classes for Engineering Schools (MPSI/MP) *December 2020 - June 2022*
  National Engineering Competition of Mauritania
- **Beely Private High School** *October 2019 - June 2020*
  Baccalaureate in Mathematics

Work Experience and Projects

- **Industrial Project in Company** *October 2023 - Present*
  École Supérieure Polytechnique de Nouakchott Nouakchott
  - **Mission** : Design and implement a platform for analyzing agricultural data generated by connected sensors.
  - **Technologies Used** : Django, Deep Learning, Arduino, ESP32 Sensors, MQTT, MongoDB, HTML, CSS, AWS
- **Web Application** *Nouakchott*
  École Supérieure Polytechnique de Nouakchott December 2023 - February 2024
  - **Mission** : Design and develop a web application for managing the National Consumer Price Index (NCPI).
  - **Technologies Used** : Django, HTML, CSS, Machine Learning, Data Visualization.
  - Project Repository: **here**
- **Study on Determinants of Infant and Juvenile Mortality** *Nouakchott*
  École Supérieure Polytechnique de Nouakchott December 5, 2023 - January 22, 2024
  - **Mission** : Conduct an in-depth study on the main factors of infant and juvenile mortality in Mauritania.
  - **Technologies Used** : Python, Stata, logistic regression , Predictive Analysis.
  - Project Repository: **here**
- **Discovery Internship** *July 3 - 28, 2023*
  National Agency of Statistics and Economic and Demographic Analysis Nouakchott
  - **Mission** : Design forecasts for price indices, analyze GDP , and formulate projections based on time series analysis.
  - **Technologies Used** : R, Excel, PowerBI
- **Entrepreneurship and Innovation Project** *November 2022 - May 2023*
  École Supérieure Polytechnique de Nouakchott Nouakchott
  - **Mission** : Design and manufacture a "Solar Oven," a solar energy storage system for various purposes.
  - **Tools Used** : Solidworks for 3D modeling and simulation, Matlab/Simulink
- **Tutor for High School Students** *August 2022 - Present*
  Nouakchott
  - **Mission** : Aid and mentor high school students in their studies and extracurricular activities.
  - **Skills Used** : Teaching Maths and Physics-Chemistry, Communication, Problem-solving.

Skills

Programming Languages : Python, R, C++, Stata, Matlab

Proficient in Office Tools

Web Development : Django, Flask, Flutter, R Shiny

Unix/Linux Environment Usage

IoT Skills : Arduino, MQTT, Sensor network design, Embedded systems integration

Behavioral Skills : Communication, Time Management, Problem-solving, Adaptability, Collaboration

Collaboration Frameworks : Gitlab, Github, Google Collab

Main Courses Followed

Big Data, Machine Learning, Deep Learning, Data Warehousing, Web scraping, Data Visualization, Time Series Analysis, Predictive Analysis, Advanced Statistical Analysis, Handling Missing Data, Data Structures and Algorithms, Econometrics, Macroeconomic Modeling, Financial Management.

Languages

English : Upper intermediate
French : DALF C2
Arabic : Proficiency
Pular : Native speaker

Associative Life

- **ESP DATA CLUB** *October 2022 - Present*
  Active Member Nouakchott-Mauritania
  - Organizing events and competitions to promote strategic use of data.
  - Conducting data analysis workshops for beginners.

- **ESP Robotics Club** *March 2023 - Present*
  Active Member Nouakchott-Mauritania
  - Facilitating understanding, design, and learning of robotics for students.

Certificates

DALF C2 : Diplôme Approfondi de Langue Française, C2 level

TrackTest B2 (English)
